Can't catch big fish in ocarina of time

There's a hut with a fishing pond located in Lake Hylia that's across the water from the scarecrow. Inside, you can rent a fishing rod for 20 rupees. You can spend as much time as you want in the fishing pond until you leave. advertisementCast your line using the B button or press A to restart. Once the lure has been dropped, you can wiggle the bait around to attract the fish. Once you feel a tug, press and hold the A button while pulling back on the circle pad to start reeling the lure in. Hold down the A and R buttons to reel in the fish faster. The bigger the fish, the stronger the fight! It seems like controlling your reeling in with the Circle Pad has a direct affect on the fish. Pulling left or right seems to help tire the fish out, while holding down reels faster. Pulling back on the circle pad reels the fish in, but you can also press left or right to give the fish less reason to snap the line. Mix it up a bit to keep the fish interested in your bait.The fish bite the most right at the break of dawn or during sunset. You can manipulate this optimal fishing time by playing the Sun's Song outside and heading into the hut afterwards.Walk around with Iron Boots to corral the fish into the center of the pond. Z-target the obviously big one and keep track of it as you cast your lure.Shake the lure a tiny bit as you drag it over your target fish, stopping for a split second between shakes. If you lose a fish, leave the pond and come back -- it won't bite again.Fish permutations in the pond are random. Return to find bigger fish or the Hylian Loach.After catching a 10+ pound fish as Young Link or a 15+ pound fish as Adult Link, you can find the Sinking Lure and catch the largest fish in the pond: the Hylian Loach. Note that if you catch the Hylian Loach, despite being the heaviest, your fish weight record will not be saved. There are several spots where the Sinker Lure might be in the Fishing Pond at Lake Hylia. Use the Sinker Lure to catch the pike-like Hylian Loach. The lure is invisible so you must walk over it and get a notification to find it. You will have to find it again if you quit fishing. At the source of the river.Back flip over the 3 rocks near the poles and river (land on the middle one) at the end of the stream.On the large, arched log in the water.In the grass along the outside wall.Catch a 15 pound fish as Adult Link and show it to the owner to get the Golden Scale. The Golden Scale can be used to get a Heart Piece at the Lakeside Laboratory. Just dive down and touch the bottom of the lab pool and the man there will give you the Heart Piece. advertisementCatch a 10 pound fish as a child and show it to the pond owner to weigh it and he will give you a Heart Piece. Index of Tips And Tricks
• Complete Walkthrough A little guide to help you catch a big fish Big fishes are found either in the middle of the pond, near a boat-shaped branch, or near the three poles sticking out of the water. You can try to spot them with the Z-lock or the Iron Boots, but don't come too close or else they'll swim away! You can climb on the big branch to see if there is a fish in the middle of the pond, but don't try fishing it from here, it's almost impossible to catch. It's best to stay on the edge to fish a fish (if you're standing in the pond, it will be harder to fish it out). Fishes bite more during sunrise and sunset! As Adult Link, you don't have to catch the biggest fish, but you have to beat the record set as a child. (If you've never fished as a child, you have to catch a first fish to set a record, then beat this record.) Once you've spotted a fish, cast your lure. During the cast, you can press A so it doesn't go too far. Then, use your joystick to move your fishhook. Fishes are attracted by movement, not by a motionless fishhook. As soon as the fish bites, press A and pull your joystick down, then after 4-5 seconds, let the joystick go and press R (keep holding A down). When the fish is starting to get out of the water, move your joystick right or left to take it out faster. If you aren't able to take it out, it will go away, you'll then have to find another fish. Like in real-life fishing, stay calm and be patient! This is where the biggest fish of the pond often is / You have better chances to succeed by looking near the three poles. Secrets of the pond Some of you may have heard about a special lure and an eel, well yes, they do exist! Sinking Lure This fishhook allows you to catch fishes more easily, but you won't earn any rupee for the fishes caught using it. As a child or an adult, go to the fishing pond and rent the fishing rod. Walk either near the rocks by the stream, or where the stream meets the pond. Roll around these places to find this invisible lure. You have to be patient and try several times before you can find it. As a child, you can also find it on the tree trunk on which you can stand in the pond - you just have to walk on the trunk to find it. Eel The eel in an enormous and very rare pike that weights 30 pounds. The sinking lure is highly recommended if you want to catch it, but it's not mandatory. As Adult Link, go to the fishing pond at NIGHT and rent the fishing rod. Use the Iron Boots and the Zora Tunic to be at ease underwater and spot the eel at the bottom of the pond. Then, go back to the surface, cast your line as close as possible to the eel and catch it like any other fish (but it's really hard!). The owner will give you 50 rupees for this catch, but since it's very rare, he won't keep it in the fishtank. Note: This fish can also be caught as Young Link, but only if you have the patience of a saint! According to Maïckel, when you see circles around your lure, it's the eel, and to catch it, you must move your lure to place it in a circle (hard because it's moving around it). Thanks to Alexandre and his friends for these secrets! (personnaly, i still haven't caught it) The owner's hat At the Fishing Pond, there's another funny thing to do: steal the owner's cap! To steal it as Adult Link, you have to:
- Rent the fishing rod - Stand in front of the man, far enough so that if you cast the line, the hook lands roughly at the owner's level.
- Cast the line and do your best to stop it mid-air. Forget Zelda. Ignore Hyrule. Ganondorf? Pah. We all know the biggest achievement in Zelda: Ocarina of Time is catching the fabled Hylian Loach fish. Since Ocarina of Time 3D has just been released for 3DS, it's a great time to catch up on your fishing skills and hook this beast using our walkthrough.
1. As adult Link, head to the fishing pond at Lake Hylia. It's in the Southern part of Hyrule.
2. Catch a regular fish (around 15 pounds) to get the golden scale from the pond's owner.
3. Find the sinking lure. Search in the grass on the outer edges of the fishing pond, check out the rocks near the back area or head to the stream of running water there. It can be in any of those locations.
4. Once you've found it head back to the pond owner and talk to him. Click 'Let's talk about something' - he'll let you officially use the sinking lure to catch fish.
5. Locate the Hylian Loach. It's usually in the centre of the pond, deep at the bottom, slightly towards the back. Use the Zora Tunic and Iron Boots to look for it if you're having difficulty, but get out of the pond afterwards.
6. Cast your fishing line so the lure rests just behind the Loach. Avoid grabbing the attention of other fish - if you need to move them away, walk around or swim among them to disperse them.
7. Be patient. Try not to wriggle the lure too soon. The Loach will move every few minutes to go up for air - that's your chance to wriggle the lure slightly and grab its attention. Be prepared to try and try again at this point.
8. If you did it right, the Hylian Loach will follow your lure. Wriggle it a bit more and the fish should bite the hook.
9. Tap the action button like mad to reel it in. If the Loach pulls to the right, move the slider stick to the right, if it moves to the left, tilt the slider to the left.
10. Keep this up and you should eventually land the fish.
11. Head back to the pond owner and he'll give you a purple rupee which is worth fifty rupees. Not the greatest reward, we know.
12. As punishment for his mediocre gift, you can use the fishing rod to grab the pond owner's hat. You can dunk it in the water a few times and it will eventually sink. Then you'll have to pay a fifty rupee fine. But hey, you won't lose any money if you caught the Loach, and it's worth it for the comedy value. Video: Catching the Hylian Loach Thanks to batman9502 for the video. It's for the N64 version of Ocarina of Time, but can be used for the 3DS version too. Have you caught the Hylian Loach? How much did it weigh in your game? Link's AwakeningOcarina of TimeMajora's Mask 3DTwilight Princess Ocarina of Time (Himekawa) Fisherman (LA)Fishing Hole Man (Oot | MMSD)Hena (TP) Piece of Heart (LA | Oot | TP)Golden Scale (Oot)Bottle (TP) The Fishing Holes.[1][name reference needed] also known as the Fishing Ponds,(LA)[2] are recurring locations in the Legend of Zelda series. They usually consist of a small, secluded areas in which Link, for a small fee, is allowed to roam freely and fish wherever he wants. The Fishing Holes are usually home to a variety of prizes that Link can receive by catching a record-size fish. Appearances Link's Awakening In Link's Awakening, a Fishing Pond is located in the north-western part of Mabe Village, north of Madam MeowMeow's house. Link can pay 10 Rupees to Fish.[3] The pond is inhabited by five Fish; three of which are runts and the other two are lunkers. The Fisherman rewards Link with 5 Rupees for a runt and 20 Rupees for a lunker.[4][5] The first time Link catches a lunker, it will yield a Piece of Heart. The Pond will refill itself every time Link visits it; however, if he manages to fish the Pond dry, the Fisherman will suggests that Link fish at the ocean instead. He soon denies saying that, though, and insists that Link leave.[6][7] In Link's Awakening for Nintendo Switch, the Fishing Pond features new fish that periodically swim into the Pond if it is not full. The rewards for Fish caught are determined by their size. New creatures are available, including a Blooper, a Cheep Cheep, and Of' Baron. A Fairy Bottle can be found in the weeds growing at the bottom of the Pond. Rather than being inside a specific Fish, the Piece of Heart is rewarded for the first time Link catches a lunker worth 20 Rupees. Ocarina of Time In Ocarina of Time, the Fishing Pond is located in a small island of Lake Hylia. The pond is open at any time, and for the price of 20 Rupees, the Fishing Hole Man hands Link a Fishing Rod, allowing him to fish for an unlimited time.[8] Every time Link catches a fish, he will be asked whether he wants to keep it or not, as he can only keep one fish at a time.[9] Any fish that he shows to the Fishing Hole Man will be weighed and, if it breaks the current record, it will be kept inside a fish tank near the entrance which shows its size and the name of the angler.[10] Along with having the fish displayed, Link will also be rewarded with prizes depending on whether he is a child or an adult.[11] If he catches a fish that surpasses the current record by at least four pounds, he will be given a Piece of Heart as a child and the Golden Scale as an adult. However, Link can only use the regular lure to catch fish, since Sinking Lures are prohibited and will grant the Fishing Pond owner the right to deny Link a prize.[12] Because of this, the Sinking Lure does not appear in the past until Link has obtained the Piece of Heart, and it will not appear in the future until the Golden Scale is obtained.[verification needed] The fish will still be put inside the fish tank, but it will include a note stating the illegal use of the Sinking Lure.[13] The size of the fish that Link can catch varies depending on the time period. Once he returns to the Fishing Hole as an adult, the fish will all have grown.[14] The biggest fish Link can catch as child and adult is the Hyrule Loach. When caught, the Fishing Hole Man will reward Link with 50 Rupees, although it will be released afterwards as it is an endangered species.[15] The biggest normal fish Link can caught is located in the middle of the pond, near a tree trunk sticking out of the water. There are four rules posted in a sign near the pond.[16] all of which can be easily broken without causing Link to get kicked out. No Sinking Lures No littering No running No casting at anyone Twilight Princess The interior of the Fishing Hole hut in Twilight Princess In Twilight Princess, the Fishing Hole is located in the Upper Zora's River and is known as Hena's Fishing Hole.[17] It is owned by Hena, a young fishing enthusiast who claims to be a descendant of the Fishing Hole Man from Ocarina of Time.[18] The area contains a large lake and Hena's hut which includes fishing guides, fishing discounts, and the Rollgoal minigame. Each time Link enters the Fishing Pond, the scenery changes to one of the four seasons, with the default season being spring. This becomes important when seeking to catch the Hylian Loach, since the rare fish can only be caught during summertime.[19] Inside of Hena's hut, Link can examine various things around the shop to make Hena comment about them.[20] There are also various Pictographs of Hena and her siblings catching fish, as well as a picture of the Fishing Hole Man from Ocarina of Time holding a Hylian Loach.[18] If Link observes the small game located near the hut's entrance, he will be given an opportunity to use the Frog Lure. There is also a large fish tank specially made for customers, where Hena keeps the biggest of each fish type that gets brought in.[21] At first, there are only Greenlills inside the tank, but Link can fill it up with four more types of fish provided he catches them by lure fishing. These include the Hylian Bass, the Hylian Pike, the Ordon Catfish, and the Hylian Loach. Inside the Fishing Hole, Link can also find a Piece of Heart, an empty Bottle, and the Sinking Lure. The Piece of Heart is located above a small cliff in the middle of the pond. It can be obtained by casting the Fishing Rod at it while lure fishing, or by wearing the Zora Armor, swimming out to it, and using the Clawshot to draw it to Link. The Bottle is found in a small, closed off area near a bridge on the east side of the Fishing Hole. It can be caught by casting the Bobber Fishing Rod. The Sinking Lure is located at either the highest point of the east bank, or the westernmost part of the south bank. The lure can only be obtained after catching a Hyrule Bass, Ordon Catfish, and Hylian Pike. In order to try lure fishing, Link must first consult with Hena, who will allow Link to use both the Fishing Rod and the canoe. Link can fish alone with unlimited time for just 20 Rupees.[22] However, for 100 Rupees, Hena will join Link and advise him on several things such as the best spot to fish,[23] but will not allow the use of a Sinking Lure, as she believes it is cheating and harmful to the fish and environment.[24] She will, however, allow him to use three different types of floating lures: the Swimmer, Popper, and Spinner types.[25] If Link uses the Sinking Lure while fishing with Hena, she will take it away from him.[26] Hena also allows Bobber Fishing, which is open to the public and is completely free.[27] By using Link's Bobber Fishing Rod, he can stand in the shore and cast for as long as he wants. However, any fish he catches while Bobber Fishing will not be put inside Hena's fish tank. Instead, they will be recorded on the Fish Journal. Majora's Mask 3D Main articles: Ocean Fishing Hole and Swamp Fishing Hole In Majora's Mask 3D, two Fishing Holes can be found in Termina. The Swamp Fishing Hole is located in the Road to Southern Swamp, next to the Swamp Shooting Gallery. The Ocean Fishing Hole is located in the Zora Cape, next to the Great Fairy Fountain. Link can fish in both places for 50 Rupees or by using a Fishing Hole Pass, which allows him to fish for free. Link can select between a standard Fishing Rod or one with a Sinking Lure. A fishing journal, which is found next to the counter, can be used to keep track of the fish Link has caught.[28] The journal also shows the record size for each fish and the date and time in which it was caught. Each Fishing Hole features 12 different type of fish. The walls are adorned with posters containing information of the fish that can be caught in the specific pond and how to catch each one. The Swamp Fishing Hole features a stone pillar in the center of the pond. Lily Pads can also be found floating on the water, which Deku Link can use to reach the pillar. A waterfall leading to a closed off area with a bridge can be found to the west. To the north, an area with thick vegetation can be found, which features an underwater cave. The Ocean Fishing Hole is located at a shore leading to the ocean. If Link tries to swim too far away from the shore, the Ocean Fishing Hole Man will prevent him from going any farther.[29] Several stone pillars can also be found leading into the ocean. To the west, a small island can be spotted, with a sunken ship found underwater, while an underwater cave resides in the east. Some fish can only be caught on certain days and certain hours. Link must wear different masks or play a song in order to attract and catch some types of fish. Once the correct mask is worn or the correct song is played, a jingle will play if the fish is currently found on the area. These masks include the Pierce Deity's mask, the only areas outside of Boss Rooms the mask can be used. 1. "Fishing Pond" — Signpost (Link's Awakening DX)
1. "How about some fishing, little buddy? I'll only charge you 10 Rupees..." — Fisherman (Link's Awakening DX)
1. "It's a runt! I'll only give you a 5 Rupees prize for that. You should try again!" — Fisherman (Link's Awakening DX)
1. "Wow! Nice Fish! It's a lunker!! I'll give you a 20 Rupee prize! Try again?" — Fisherman (Link's Awakening DX)
1. "This pond's all fished out. Why not try your luck in the sea?" — Fisherman (Link's Awakening DX)
1. "Did I say that? Forget it, okay? Run along now..." — Fisherman (Link's Awakening DX)
1. "Well, do you want to go fishing for 20 Rupees?" — Fishing Hole Man (Ocarina of Time)
1. "However, you can keep only one fish. The biggest fish ever caught here weighed "x" pounds." — Fishing Hole Man (Ocarina of Time)
1. "The biggest fish ever caught in this pond weighed "x" pounds. The angler: Link" — N/A (Ocarina of Time)
1. "WHOA! This fish is huge! It looks like a new record! It weighs at least "x" pounds! Seriously! OK, here is your prize!" — Fishing Hole Man (Ocarina of Time)
1. "YAHOOOOOO! This is HUGE!! A new record!! This...this weighs as much as..." "x" pounds!! Buuuuuuuut! That sinking lure is in violation of the rules! So, no prize for you. Wah ha ha ha ha ha!" — Fishing Hole Man (Ocarina of Time)
1. "The biggest fish ever caught in this pond weighed "x" pounds. The angler: Link (NOTE: With illegal sinking lure.)" — N/A (Ocarina of Time)
1. "Come back when you get older! The fish will be bigger, too... Well, maybe." — Fisherman (Ocarina of Time)
1. "Recently, the number of these fish has decreased tremendously, so I'm going to release this one." — Fishing Hole Man (Ocarina of Time)
1. "Rules and Regulations / 1. Don't use sinking lures. / 2. Don't litter. / 3. Walk quietly. / 4. Don't cast at anyone." — Sign (Ocarina of Time)
1. "Hena's Fishing Hole / It's a fight against nature with lure fishing! What kind of fish can you catch?" — Lanayru Tourism (Twilight Princess)
1. 18.0 18.1 "That's one of Hyrule's legendary master fishermen! Look, he's got a Hylian loach, doesn't he? He just may be one of my ancestors! Of course, I can't exactly PROVE that... It's kinda just wishful thinking on my part." — Hena (Twilight Princess)
1. "They're not very active in cold weather either, so the best season to catch 'em in is summer!" — Hena (Twilight Princess)
1. "Aren't you a little young to be interested in jar collecting? I don't want those to get broken, so I store 'em up out of the way. It sounds crazy, but I've heard stories of people who have nothing better to do than go around breaking every jar they see. I mean, is that the dumbest thing you've ever heard in your life? Who would DO that?!" — Hena (Twilight Princess)
1. "That's a special fish tank just for my customers! Of course, I don't wanna encourage overfishing, so I only keep the biggest of each fish type that gets brought in." — Hena (Twilight Princess)
1. "It's 20 Rupees to try some lure fishing. There's no time limit, and the canoe rental's included!" — Hena (Twilight Princess)
1. "You can also get yourself a charming and savvy guide, but that deluxe fishing package will run you 100 Rupees!" — Hena (Twilight Princess)
1. "Sinking lures are NOT allowed! That's what we call CHEATING! Those things attract even the fish that aren't really hungry. Does that sound fun to you? No. Not only is it no fun, but it's bad for the ecosystem. It changes fish's feeding habits, and then NOBODY will be able to catch them. Sinking lures have been banned here for generations: that's why you can still catch fish here!" — Hena (Twilight Princess)
1. "You can only fish with floating lures here, and I lend out three different types. The basic lure's the swimmer type, but I also have poppers and spinners!" — Hena (Twilight Princess)
1. "You can't use sinking lures here! Yeah, THAT one! That's cheating!" — Hena (Twilight Princess)
1. "Fishing Hole / Bobber fishing open to public." — N/A (Twilight Princess)
1. "Look at that! It's a fishing journal! Maybe it belongs to that guy there? Actually, it looks pretty abandoned... Well, that's kind of neat! With this I should be able to help you keep track of the fish you've caught." — Tatl (Majora's Mask 3D)
1. "Whoa, there! Come back! There be dangerous currents if ya go too far out. I love fishin' too, but it's not worth it. Stick closer to shore." — Fishing Hole Man (Majora's Mask 3D)
